

OUR PROVEN

Our Business Process underlines the strong emphasis on how the work is done within our organization. It is a process of minutely planned activities across time and place, to maintain the highest quality in every step and to encourage continuous improvement in efficiency.

BUSINESS PROCESS MODEL

Our emphasis on a meticulous Business Process makes exceptions work within the rule, and will not stifle ad-hoc opportunities. Whether it is a full blown development project or just consulting, drawing review, a specific design or a machined part, you are equally welcome.

** In a development project situation, the flow chart would be considerably more complicated.*
